

## COGNITIVE CARE ADVOCACY

After a Memory Clinic assessment or neuropsychological evaluation, clients and families may not be sure how to implement recommendations and findings. The Cognitive Care Advocacy Program supports the client and family by offering direct assistance to improve emotional and cognitive health and optimize quality of life for both clients and caregivers.

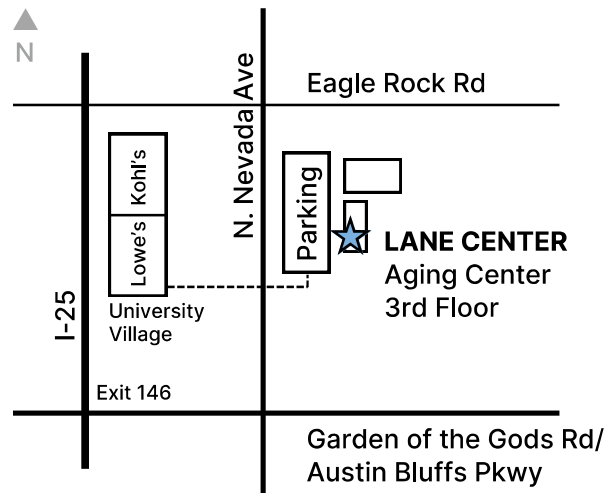

**For caregivers and clients  
interested in assistance with:**

problem-solving; decision-making; memory; safety; housing; financial management; coping with a diagnosis of Alzheimer's disease or other dementia

HealthCircle  
Aging Center
